AWS S3 Static Website Hosting

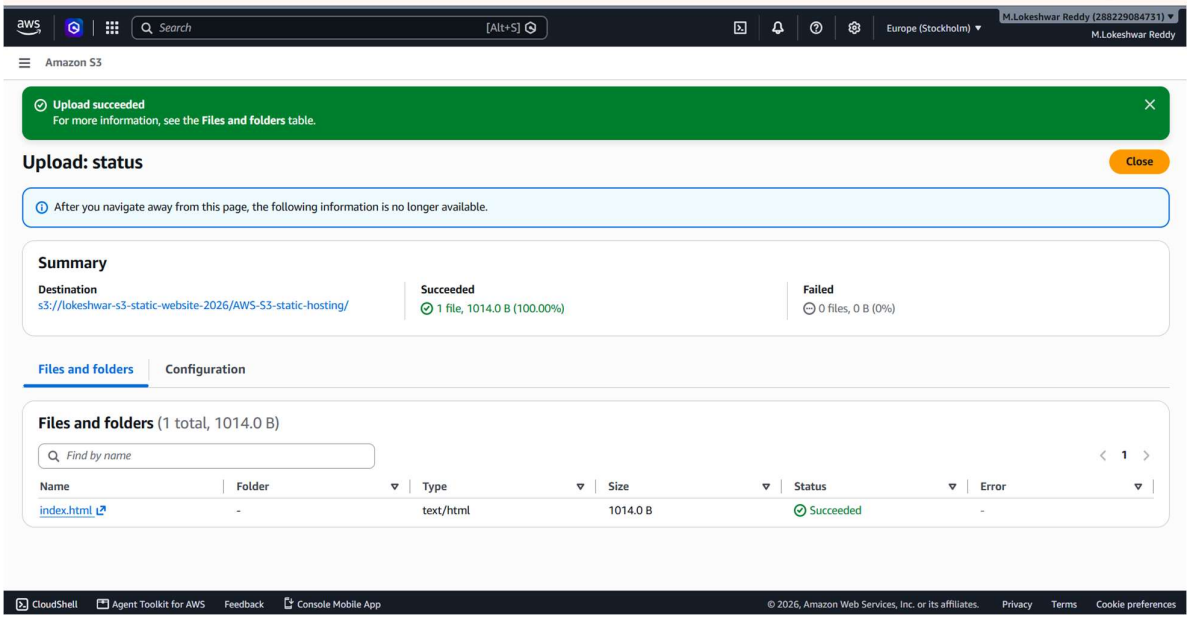

Name : M.Lokeshwar Reddy
USN : 23BTRCL217
ID : HCLTFP2283087
Collage Name : Jain University

Aim: To host a static website using Amazon Simple Storage Service (Amazon S3).
Tools required: AWS account, web browser, and Notepad.

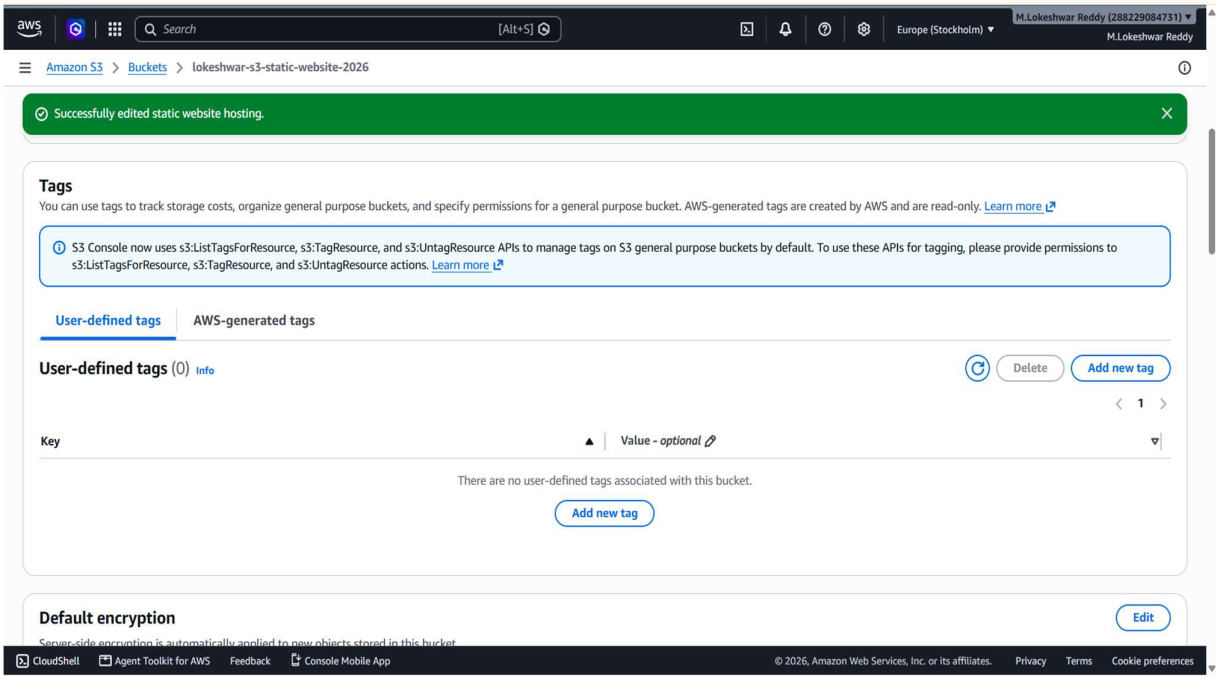

Step 1: Create your S3 bucket

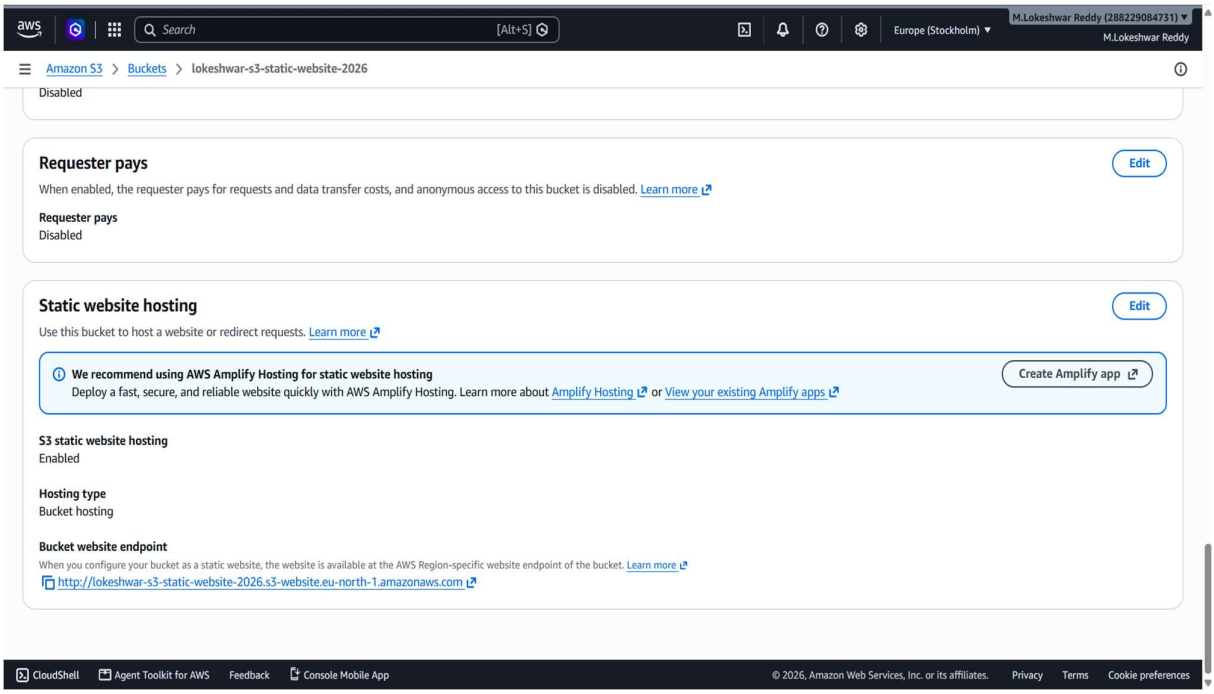

Step 2 : Website file uploaded

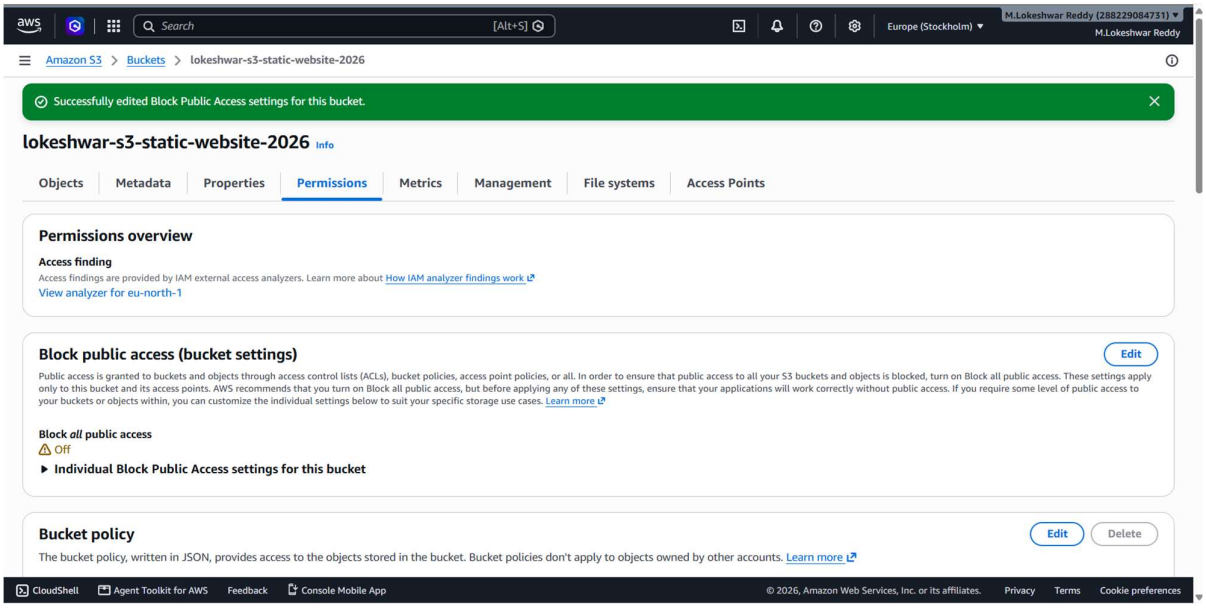

Step 3: Check the file location

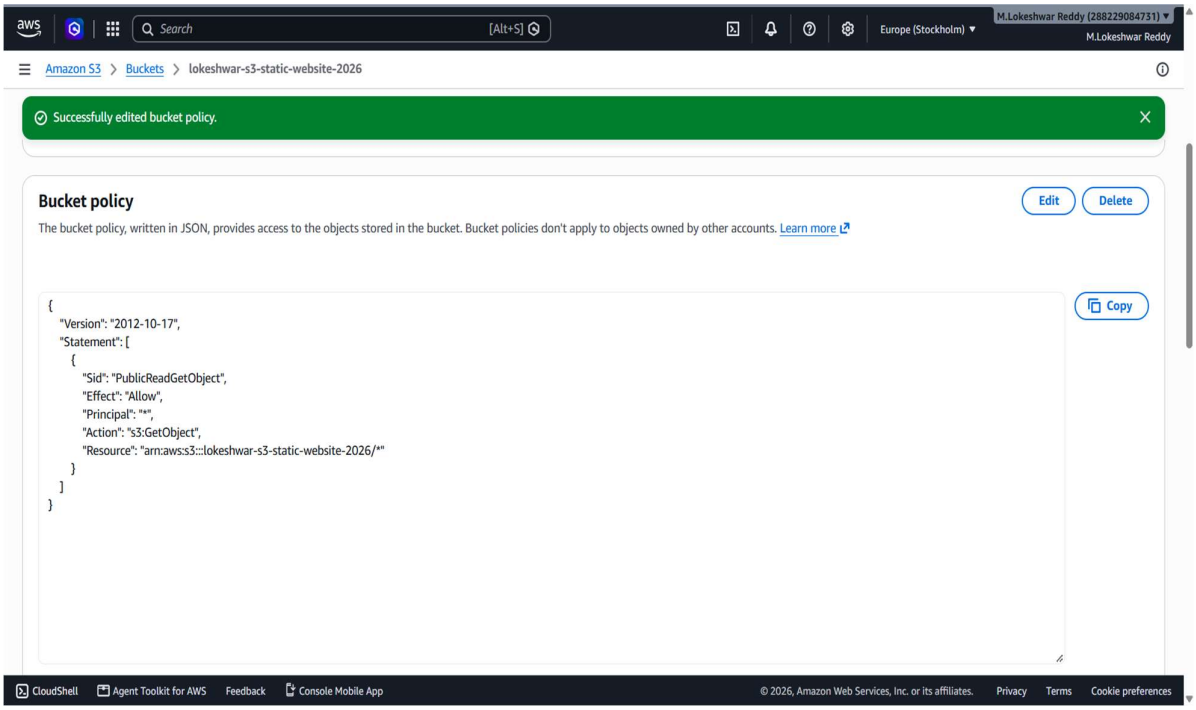

Step 4: Enable static website hosting

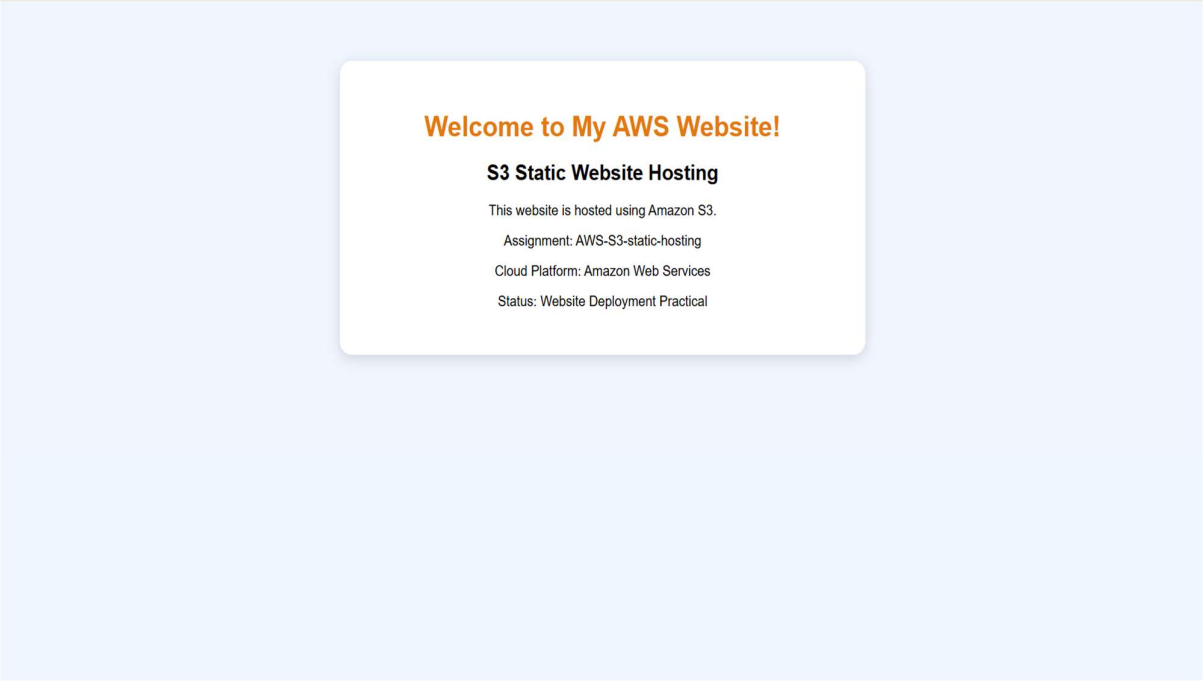

Step 5: Configure public access

Step 6: Add the bucket policy

Step 7: Test your website

Result: Successfully created an Amazon S3 bucket, uploaded an HTML webpage, enabled static website hosting, configured the required access permissions, and accessed the deployed website through the S3 website endpoint.
